

RAG Chatbot Testing Document

This document is created specifically for testing a Domain-Specific RAG Chatbot.

Document ID: RAG-TEST-001

Department: Computer Science and Engineering

Academic Year: 2026–2027

1. Student Attendance Policy

Students must maintain a minimum attendance of **75%** to be eligible to appear for the regular semester examinations. Students with attendance between 65% and 74% may apply for condonation according to the institution's rules. Attendance below 65% normally makes a student ineligible for regular examination participation.

2. Library Rules

The college library is open from **8:30 AM to 6:00 PM** on working days. Students may borrow up to **three books** at one time. The normal borrowing period is **14 days**. A late fee of **₹2 per book per day** is charged after the due date.

3. Examination Guidelines

Students must carry a valid college identity card and examination hall ticket. Mobile phones, smart watches, and other unauthorized electronic devices are not permitted inside the examination hall. Students should arrive at least **30 minutes before** the scheduled examination time.

4. Computer Laboratory Rules

The computer laboratory operates from **9:00 AM to 5:00 PM** on regular working days. Students must log in using their assigned accounts. Installing unauthorized software is prohibited. Students must save academic work in the designated project folder and log out after completing their work.

5. Project Submission Rules

Major project submissions must include the source code, project report, README file, and a demonstration video. The final project must be uploaded to the assigned Git repository before the submission deadline. Students are responsible for checking that all required files are present and accessible.

6. Important Contact Information

Service	Contact
Department Office	cse-office@example.edu
Library	library@example.edu
Technical Support	support@example.edu

7. Testing Notes

This document intentionally contains information that can be used to test retrieval, source-page identification, multi-topic questions, and unavailable-answer handling. Questions about topics not mentioned in this document should produce the chatbot's configured 'information not found' response.
